We need much more time than 6 months
to do an impact study and rainification health
study.

Studies are not going to be completed this quickly.
The public is unaware of the dangers and they
need notification which takes time.

What are "safe" levels of Benzene exposure
to an infant?

How deep do the chemicals used in fracking
reach?

Has anyone mapped waterways in Co.
& compared them to the location of present
wells?

What about the earthquake & land instability
created by these methods?

What happens to the toxic spills. How are
they cleaned up & where is toxic matter disposed? over →

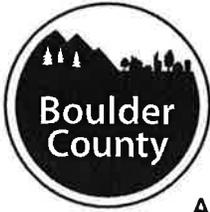

I have great concerns that so many questions remain unanswered.

Our water is a precious resource that belongs to everyone. These items such as air, water, and perhaps even land are or should be considered as belonging to all living things.

Once we upset the balance how do we correct?

We need much more time to study than we can do in 6 months.

I would suggest that there be baseline testing of all land & water for all chemicals so that if they are polluted (contaminated) by the drilling it will be easier to sue for damages in court with proof of damages.

Thank you for your attention to this matter

I think the county should work with other counties
and municipalities to sponsor a citizen initiative to
change state law concerning drilling. The legislature
is not going to change the law; that's why it needs
to be a petition - similar to Amendment 37 on renewables.
The public does not want fracking and everyone
keeps stating we have to work within the legal
constraints - that's why the law needs to be
changed. In the interim - protect citizens within
your ability by changing the comp plan -

Thank you for keeping the health of the
citizens and the environment in ^{your} considerations.
I appreciate the continued moratorium.

We also need to look at how much H₂O
is used for fracking and taken out of the system
due to contamination from the chemicals used
in this process.

I would like to see solar panels and wind mill technology at every natural gas well to replace them. We know natural gas is not renewable, we must learn from the past drilling disasters that we cannot conduct deep drilling in the earth without major catastrophes. No spill is ok. It's too late then. Please, do not let this happen here. Ban Fracking, fund renewable energy. Not enough test are available on groundwater, soil contamination and air toxins, we are breathing now.

There is no right way to do the wrong thing!

Let's ban fracking.

And as citizens and consumers to do everything we can do to reduce our dependance on the ~~for~~ fossil fuel industry.

But we are with you. Let's stand up.

Gas and oil companies are going to die.

We are going to run out of fossil energy.

We don't want to let them poison us.

Let's invest in wind and solar energy.

Please insure that any and all damage caused by fracking is corrected and paid for by the companies and industries involved and NOT by city and county taxpayers

Thank you for continuing to ~~to~~ explore ways to control the ^{rapid expansion} ~~burgeoning~~ of O+G in Boulder County. Please continue to listen to the B.C. citizens, especially those who are being immediately impacted. Don't be afraid to take a stand, be a leader in this state. We are behind you -- whatever it takes!

THIS FRACKING IS PUTTING ALL OF LIFE
AT UNBELIEVABLE RISK! THE USE OF GMO
SEEDS IS ALSO SUICIDAL! THEY ARE KILLING BEES
THAT WE CAN'T LIVE WITHOUT, PLUS MANY OTHER DESTRUCTIVE
ANYTHING THAT POTENTIALLY AFFECTS THINGS.
EVERYONE, SHOULD BE DETERMINED BY
ALL AFFECTED - NOT THE VOTE OF A FEW.
OF ALL PLACES TO EVER EVEN CONSIDER
AS FRACKING AND GMO'S
SUCH A DEVESTATION, I THOUGHT BOULDER
COUNTY WAS SUPPOSED TO BE COMPOSED
OF MANY WELL EDUCATED, INTELLIGENT
PEOPLE - THIS IS ALLOWING DEVESTATION
TO OUR WATER & FOOD SOURCES
WATCH GASLAND PLEASE WAKE UP!
BEFORE IT IS TOO
LATE!

Fracking destroys all life.
Millions of gallons of water
are used to pack a site with
many ^(all) toxins that get into our
aquifers + pollute us.
Water is more precious than
shale oil

Our air is important. We
have a right to clean air
clean water and noise
quality and life!

So do our animals, that live
on the planet - All life

Thank you for extending the moratorium 6 mos. However, I'd appreciate a thorough investigation of the Howarth study. Pam Milmo focused on only one study and didn't take into account Howarth/Ingraffea. After Ingraffea is the "father" of fracking.
