

Zoonotic Disease Report July 03 – July 09, 2016 (Week 26)

Executive Summary

- To date, only one human West Nile virus (WNV) case has been reported statewide from Larimer County.
- To date, only one WNV positive mosquito pool has been reported statewide from Larimer County.
- Mosquito counts for the week are slightly below average; however, limited trapping was performed this week due to the 4th of July holiday.
- One coyote, one raccoon, and one cat were submitted for rabies testing, all testing negative.
- To date, 56 specimens have been submitted for rabies testing with seven testing positive. This compares with last year at this time with 49 specimens submitted and five positives.
- No specimens were submitted for plague, tularemia or hantavirus.

Information about symptoms, transmission, and prevention is always available at BoulderCountyVector.org

West Nile Virus (WNV) Activity

Mosquito Activity

West Nile Virus (WNV) Vector Index

The vector index is a function of calculated infection rate, adjusted for *Culex* mosquito population size, within a given area. It is used to estimate human West Nile Virus (WNV) transmission risk. A vector index of **0.75** or above in Boulder County is an indicator of high risk for WNV transmission to humans, and influences the Mosquito Control District’s adult mosquito emergency control measures. A vector index is calculated for [three monitoring zones in Boulder County](#).

NOTE: (*) indicates that every pools submitted for that zone tested positive, therefore an infection rate and vector index for that zone cannot be calculated.**

VECTOR INDEX			
	ZONE 1	ZONE 2	ZONE 3

Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect samples submitted by Boulder County Public Health and may not include samples submitted by other agencies or private veterinary practices
- ‘Positive Vectors’ include only samples that have tested positive. Some samples submitted may be deemed untestable.
- ‘Submitted Vectors’ denoted with (*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
